INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/US05/09091**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Claims <u>1-42</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-42</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-42</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and Explanations (Rule 70.7)

Claims 1-42 meet the criteria set out in PCT Article 33(2)-(3), because the prior art of record does not teach or fairly suggest a method of activating an organic coating to enhance adhesion of another coating to be applied thereon comprising applying a solvent and an adhesion promoter, wherein contact of the organic coating with the solvent, or the solvent and adhesion promoter combination, results in swelling of the organic coating, whereby the adhesion promoter is selected from the group of chemicals claimed in claim 1. Likewise, the prior art of record does not teach or fairly suggest a coated substrate having an activated organic coating, where the adhesion of the activated coating to a further coating has been enhanced by application of a solvent and adhesion promoter selected from the group of chemicals claimed in claim 39, such that contact of the organic coating with the solvent or the solvent and adhesion promoter combination results in swelling of the organic coating.

The closest prior art of Meder (US 5,212,017) teaches use of a gamma-aminopropyltrimethoxysilane adhesion promoter, and does not teach an adhesion promoter selected from the claimed group.

Claims 1-42 meet the criteria set out in PCT Article 33(4), and thus meet industrial applicability because the subject matter claimed can be made or used in industry.
